

## Systems selection

Select an audio or video system according to the required number of apartments. Choose between single or double push button and door panel model (Stadio Plus or Nexa modular). Some technologies are not yet available on Nexa modular door panel.

The first line of each composition shows the number of apartments and the door panel external dimensions. The second line shows the mechanical door panel components.

Lock release are not described.

### Audio systems.

Select one of the following technologies:

#### 4+n analogue installation.

Shows the system composition with electronic call telephone. If buzzer call is required, use T-710R telephone instead of T-700 model.

#### 2 wires "2Plus" digital installation.

This system composition is not yet available with Nexa modular panel.

#### 4 wires "Plus" digital installation.

If telephones with additional features are required (as output for call repeater or relay unit, call volume regulation, ...), use T-740 Plus telephone instead of T-740 Uno.

### Video systems.

Select one of the following technologies:

#### 5 wires "Vista Plus" digital installation.

All systems compositions are shown with color camera and monitors, as far as not available in b/w.

Use D4L-R5 video distributors where required.

#### 6 wires (CAT5) "Plus" digital installation.

If 3 wires + coaxial cable installation is preferred, remove EL562 video receivers from the system composition.

Systems compositions with Stadio Plus panel are shown with b/w camera and monitors. If color system is required, change EL530 b/w camera module by EL531 color camera module and add color suffix to monitor reference.

Systems compositions with Nexa modular panel are shown with color camera and b/w monitors. If full color system is required, add color suffix to monitor reference.

If monitors with additional features are required (as output for call repeater or relay unit, call volume regulation, ...), use Tekna Plus monitor and RCTK-Plus bracket instead of Tekna Uno monitor and RCTK bracket.

If hands free operation is required, use Szena Plus SE monitors and RC-Szena brackets. This monitor includes both coaxial and twisted pair video receivers.

Use D6L-Plus/2H (twisted pair) or D4L-Plus (coaxial) video distributors where required.

#### 2 wires "V2Plus" digital installation.

Systems compositions with Stadio Plus panel are shown with b/w camera and monitors. If color system is required, change EL530 b/w camera module by EL531 color camera module and add color suffix to monitor reference.

This system composition is not yet available with Nexa modular panel.

Use D1L-V2Plus or D4L-V2Plus video distributors where required.

## Stadio Plus with single button

**1** 134(W) x 148(H)

### 2110/AL + CE610 + 600/AL
